

The Meridian Anti-Drug Coalition & Meridian Police Department Analytical Services Unit

Fentanyl Disguised as Oxycodone

2018

Evidence collected in Meridian: three round blue pills stamped "M" "30" which visually identified them as Oxycodone. After being tested at the lab they came back as Fentanyl pills. (Just three milligrams of fentanyl can be fatal, compared to 30 milligrams of heroin.)

Picture of actual Oxycodone Hydrochloride (shown as white for clarity purposes):

The Meridian Anti-Drug Coalition mission is to strengthen our community through substance abuse prevention. Our Vision is to build Meridian into a drug free community where people can safely live, work and raise a family.
